Novel

## A magical story about losing your childhood - and winning it back again

Penny and Tom are siblings. Penny trusts in life and believes in miracles, whereas Tom always needs scientific explanations for everything. But his image of the world and his trust in science is deeply disrupted when their father falls into a depression and finally commits suicide.

Tom now needs to find out about the nature of truth. Together with his sister Penny he discovers the power of stories, and how much our consciousness affects our perception of reality. The two children try to find out how to change reality by „switching to a different frequency“. They realize that the membrane between visible and invisible world has become permeable.

One day Penny carries things to far - and crosses the border of death. Tom now has to deal with everything on his own. But then he finds his sister's „Book of Wonders“, which sends him on a journey on which nothing is sure - and Tom has to face his true self.
